

Transcript: Our Purpose Video

Our state is flourishing. A unique environment, thriving commerce and a rich and varied culture make South Australia the perfect place to live.

The way of life we love is supported by vital services. These services look after our health, keep us safe, enrich our lives, they teach our kids, take care of the environment. They make our state work.

As public servants, we make sure these services run smoothly.

We make sure our citizens' needs are being met. Some of us do this directly, serving the public face to face and some of us are behind the scenes doing unseen work that is just as important in keeping our state moving.

Thanks to our commitment, energy and innovation, our community has the bedrock it can rely on.

We all want a bright future for South Australia and we help keep it on track.
